Recommendations : Botium Toys must strengthen its security posture by implementing key controls to protect sensitive information and enhance overall security. Essential measures include enforcing Least Privilege access, establishing disaster recovery plans, implementing robust password policies, enforcing separation of duties, deploying an intrusion detection system (IDS), managing legacy systems proactively, utilizing encryption, and adopting a password management system.

To ensure regulatory compliance, the company should prioritize Least Privilege, separation of duties, and encryption. Additionally, classifying assets effectively will help identify further security enhancements needed to safeguard critical information and mitigate risks.
